

Tobias Schiegl

2-time Double Luge World Champion

www.schiegl-schiegl.com

During the winter 2010/2011, I had already tested the thermal products **Thermo Soles** and **Thermo Gloves** with great success. Due to my positive experience, the trainer team of the Austrian Luge National Team (<http://www.rodel-austria.at/>) has been equipped with **Thermo Soles** and **Thermo Gloves** since October 2011. This is how those who are out in the cold, but who are physically inactive, get through the winter well. All seven trainers of the Austrian National Team now wear **Thermo Soles** and **Thermo Gloves** daily and are on the go the entire winter in icy parts of the world, i.e. Lillehammer, Igls, Calgary, Oberhof, Koenigsee, Nagano, Salt Lake City and Winterberg.

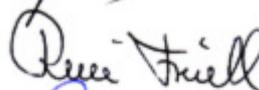

Warm hands and warm feet are essential for trainers in order to keep their minds free for technical and tactical thinking. We are simply thrilled by the **Thermo Soles** and **Thermo Gloves**, which offer us cosy warmth and thus, in every way, a feeling of well-being. We don't want to do without this comfort anymore.

We would like to thank **Thermo Soles** and **Thermo Gloves** for their sponsoring thus far and we are already looking forward to testing new **Thermo Products** soon for continuous use.
